## Independent review report to the members of

## **Compumedics Limited**

#### Statement

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the financial report of Compumedics Limited, set out on pages 5 to 10:

- does not give a true and fair view, as required by the Corporations Act 2001 in Australia, of the financial position of the Compumedics Group (the consolidated entity) as at 31 December 2003 and of its performance for the half-year ended on that date, and
- is not presented in accordance with the Corporations Act 2001, Accounting Standard AASB 1029: Interim Financial Reporting and other mandatory financial reporting requirements in Australia, and the Corporations Regulations 2001.

This statement must be read in conjunction with the rest of our review report.

## Scope

#### The financial report and directors' responsibility

The financial report comprises the statement of financial performance, statement of financial position, statement of cash flows, accompanying notes to the financial statements, and the directors' declaration for the Compumedics Group (the consolidated entity), for the half-year ended 31 December 2003. The consolidated entity comprises both Compumedics Limited (the company) and the entities it controlled during that half-year.

The directors of the company are responsible for the preparation and true and fair presentation of the financial report in accordance with the *Corporations Act 2001*. This includes responsibility for the maintenance of adequate accounting records and internal controls that are designed to prevent and detect fraud and error, and for the accounting policies and accounting estimates inherent in the financial report.

#### Review approach

We conducted an independent review in order for the company to lodge the financial report with the Australian Securities and Investments Commission. Our review was conducted in accordance with Australian Auditing Standards applicable to review engagements.

We performed procedures in order to state whether, on the basis of the procedures described, anything has come to our attention that would indicate that the financial report does not present fairly, in accordance with the *Corporations Act 2001*, Accounting Standard AASB 1029: Interim Financial Reporting and other mandatory financial reporting requirements in Australia, a view which is consistent with our understanding of the consolidated entity's financial position, and its performance as represented by the results of its operations and cash flows.

We formed our statement on the basis of the review procedures performed, which included:

- inquiries of company personnel, and
- analytical procedures applied to financial data.

When this review report is included in a document containing information in addition to the financial report, our procedures include reading the other information to determine whether it contains any material inconsistencies with the financial report.

These procedures do not provide all the evidence that would be required in an audit, thus the level of assurance provided is less than that given in an audit. We have not performed an audit, and accordingly, we do not express an audit opinion.

While we considered the effectiveness of management's internal controls over financial reporting when determining the nature and extent of our procedures, our review was not designed to provide assurance on internal controls.

Our review did not involve an analysis of the prudence of business decisions made by directors or management.

#### Independence

## Compumedics Limited Supplementary Appendix 4D information

# Material factors affecting the revenues and expenses of the economic entity for the current period

- (i) Profits after tax have improved as a result of the underlying growth in the business, improved margins from 30 June 2003 and tighter cost controls.
- (ii) The major impact on revenues, expenses and therefore profitability of the business was the movement in the AUD/USD exchange rate. At the 31 December 2003 the average AUD/USD exchange rate for the six months was 0.6863. For the same six month period to 31 December 2002 the average AUD/USD exchange rate was 0.5532. The impact of this appreciation of Australian dollar was to reduce revenue by \$3.0m as reported in Australian dollars and reduce profits after tax by \$1.1 m as reported in Australian dollars.

# Material factors affecting the assets, liabilities and equity of the economic entity for the current period

- (i) Cash has increased due to the improved trading position of the business and the consistency of that business on a month by month basis. The improvement in debtor days to 86 days at 31 December 2003 from 121 days at the same time last year and 96 days at 30 June 2003 has also positively impacted cash.
- (ii) Intangible assets. At the 30 June 2003 the Directors of Compumedics Limited decided to write off the remaining carry value of intangible assets at that time. The reasons were fully explained at that time and in the Annual Report of the Company for 2003. All Research and Development costs incurred by the business for the 6 months to 31 December 2003 have been fully expensed to the statement of financial performance for the six month period to 31 December 2003.
- (iii) Current and non-current interest bearing liabilities. The movements in these two balance sheet items reflects the re-financing of the remaining liabilities associated with the acquisition of the Neuroscan business. In December 2003 the bank refinanced these liabilities with the ANZ Bank. The remaining liabilities which totalled \$3.7m at 31 December 2003 are repayable at \$0.35m per quarter for the next three years.

# Material factors affecting the cash flows of the economic entity for the current period

The significant improvement in the cashflow performance of the business has resulted from the improved trading position of the business, an improvement in the consistency of business month by month, improved debtor days and tighter inventory management.
